Who we are

Metro Remedial is backed by decades of construction experience, with its team having delivered over 2,000 residential units across Sydney prior to the company's establishment in 2011. Their background spans dual occupancies, boutique townhouses, and multi-storey apartment buildings.

This hands-on expertise gives Metro Remedial a unique advantage in the remedial space — approaching issues with a builder's mindset. Their deep understanding of construction allows them to accurately diagnose defects and deliver practical, lasting solutions.

Metro Remedial has built a strong reputation for quality, technical skill, and reliability. Their services include structural rectification, waterproofing, façade repairs, concrete spalling, and fire compliance upgrades, always executed with precision and care.

Trusted by engineers, strata managers, and NSW Government bodies — including Icare, the Department of Education, and local councils — Metro Remedial works across residential, commercial, educational, and industrial sectors.
